

AMBATI LAKSHMI HIMAJA

Hyderabad, TS | P: +91 7396053375 | himajaambati03@gmail.com

PROFESSIONAL SUMMARY

Engineering student specializing in Data Science and Machine Learning. Strong organizational and time management skills with a proactive, self-starter attitude. Proficient in Python, SQL, and deep learning frameworks. Passionate about building AI-driven solutions.

EDUCATION

GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY

2021-2025

Bachelor of Engineering
Major in Electronics and Communication
Cumulative GPA: 9.14/10.0

SRI CHAITANYA JUNIOR COLLEGE

2019-2021

Intermediate Education
Percentage:97.4%

SKILLS

Programming Languages : Python(Intermediate),Java(Basic),C++ (Familiar)

Web Technologies:SQL,React(Basic),HTML,CSS,JavaScript(Basic)

Tools and Frameworks: TensorFlow, Keras, NumPy, Pandas

Soft Skills: Strong communication,Team work,Adaptability,Problem Solving,Quick Learner

CERTIFICATIONS

- **Deloitte Australia(Forge) :** Data Analytics Job Simulation
Analyzed forensic data using Excel and SQL, developed a Tableau dashboard, and gained expertise in data classification and business intelligence.
- **Meta,Coursera :** Introduction to Front-End Development
- **Coursera :** Programming Foundations with HTML,CSS,JS
- **Hackerrank :** Python(Basic),SQL(Basic)

PROJECTS

CLINICAL DIAGNOSIS USING MULTI-MODAL TRANSFORMER

2025

- Developed a transformer-based model that fuses diagnostic images and clinical notes to enhance disease classification accuracy.
- Achieved BLEU and ROUGE-L scores of 0.4, demonstrating strong cross-modal understanding and prediction quality.

REAL TIME COLLABORATIVE TEXT EDITOR

2025

Project | Github

- Built a real-time text editor using JavaScript, Firebase Firestore(for instant syncing) and Firebase Authentication(Google Login).

- Implemented automatic saving, unique room links for collaboration and deployed it using Firebase Hosting.

SKIN CANCER DETECTOR

2024

- Developed a convolutional neural network (CNN)-based deep learning model to accurately classify skin cancer images
- Utilized TensorFlow's Keras API, EfficientNetB0 architecture, and libraries like NumPy and Pandas to achieve an

LEADERSHIP AND VOLUNTEERING

- **Chair, IEEE GRIET Student Branch (2024)**

Led initiatives and events to engage over 500 students in technical learning and collaboration.

- **Organizer, IEEE SEFET International Conference (2024)**

Coordinated with team for the smooth conduction of International Conference on Sustainable Energy and Future Electric Transportation.

- **Co-Convenor, Pragnya'23**

Managed a team of 50+ volunteers to host a techno-cultural fest attended by over 2,000 participants.

ACHIEVEMENTS

- Boosted event participation through strategic digital and offline marketing campaigns.
- Maintained consistent academic excellence with a GPA above 9.0.
- Designed innovative machine learning models with real-world application.
